Project Title Global AI Adoption in Education
Maximum Marks 3 Marks
Data Quality Report Template

The Data Quality Report Template will summarize data quality issues from the selected source, including severity levels and resolution plans. It will aid in systematically identifying and rectifying data discrepancies in the Global AI Adoption in Education dataset.

Data Source	Data Quality Issue	Severity	Resolution Plan
Global AI Adoption in Education Dataset	Missing values in AI adoption, country, year, curriculum, or school adoption records can affect the accuracy of analysis.	Moderate	Check for blank/null values in the dataset and handle incomplete records before connecting the data to Tableau.
Global AI Adoption in Education Dataset	Duplicate records can result in incorrect AI adoption totals/percentages and misleading visualizations.	Moderate	Identify duplicate records and remove them before performing aggregation and visualization in Tableau.
Global AI Adoption in Education Dataset	Inconsistent country names, year formats, or category values can lead to incorrect comparisons across countries and years.	Moderate	Standardize country names, year formats, and categorical values before analysis and dashboard creation.
Global AI Adoption in Education Dataset	Incorrect or inconsistent data types in numerical AI adoption fields may affect calculations and charts.	Moderate	Verify data types and convert AI adoption measures to appropriate numerical formats before using them in Tableau.
