

Data Collection and Preprocessing Phase

Date	24 sep 2026
Team ID	xxxxxxx
Project Title	Global AI Adoption in Education: A Comprehensive Global Performance Intelligence
Maximum Marks	10 Marks

Data Exploration and Preprocessing Template

Identifies data sources, assesses quality issues like missing values and duplicates, and implements resolution plans to ensure accurate and reliable analysis.

Section	Description
Data Overview	The dataset contains global education and AI adoption information, including country, region, AI usage, student and teacher adoption, digital infrastructure, AI readiness, and education performance indicators.
Data Cleaning	Remove duplicate records, handle missing values, correct inconsistent country and region names, and resolve incorrect or invalid data entries.
Data Transformation	Filter and sort records, standardize values, create calculated columns and KPIs, and transform data into a suitable format for performance analysis.
Data Type Conversion	Correct data types for country, region, year, percentages, numerical values, and other relevant fields.
Column Splitting and Merging	Split combined country or location fields where required and merge related fields to create meaningful analysis columns.

Data Modeling	Create relationships between country, education, AI adoption, infrastructure, student, teacher, and performance tables, and create measures for AI adoption and performance analysis.
Save Processed Data	Save the cleaned, transformed, and modeled dataset for use in the Global AI Adoption in Education Performance Intelligence Dashboard.
